Courses	Level of studies	SEMESTER	Number of hours taught	Number of ECTS delivered	Synopsis
International business communication	Undergraduate academic studies	1 - Fall semester	20	6	Communication media and supports for international business. Specificities and necessities for foefign markets.
Export sales management	Undergraduate academic studies	1 - Fall semester	20		The internationalisation process: operations management (logistics, commercial and financial aspects)
International marketing	Undergraduate academic studies	1 - Fall semester	20		Specificities of international marketing. Strategies for internationalisation and adapting the marketing mix
Business strategy	Undergraduate academic studies	1 - Fall semester	20	3	Nature of Strategy & Strategic Decisions; Characteristics of Strategic Decisions; Levels of Strategy; Strategic Management; Strategic Choices; Understanding Strategy; Development Strategy.
Fundamentals of finance	Undergraduate academic studies	1 - Fall semester	20		Income statement, balance sheet, budgeting, ratios and control
<u>Introduction to the civilization of English-speaking countries: => 3 courses: British, Irish and American civilizations</u>	Undergraduate academic studies	2 - Spring Semester	20	3	Introduction à la géographie et à la démographie des Etats-Unis, de la République d'Irlande et du Royaume-Uni par le biais d'un cours magistral, accompagné de travaux dirigés où sont étudiés des documents en relation avec le thème du cours.
<u>UE Ingénierie de projet (3 EC) EC 3 : American cultural studies</u>	Master academic studies	1 - Fall semester	10	2	La première partie de ce cours sera consacrée à une présentation selon une perspective américaine de ce que sont les Cultural Studies notamment en ce qui concerne les questions identitaires et communautaires. La seconde partie sera centrée sur l'évolution des Cultural Studies à travers la mondialisation, la transformation des états-nations, le changement en cours des sociétés sur le plan social et économique.
<u>UE Langues et cultures (3 EC) EC 3 : Societal and cultural concepts in the English-speaking world 1</u>	Master academic studies	1 - Fall semester	20	3	L'Anglosphère, notion intimement liée à l'expérience coloniale, ne peut se réduire à une description ou une analyse du monde de l'anglophonie. Laisant de côté les pays issus essentiellement d'un peuplement européen (États-Unis, Canada, Australie), cet enseignement se concentrera sur les pays de rencontre entre les cultures colonisatrices et les cultures des peuples colonisés. Il s'agira de présenter le concept d'Anglosphère et de montrer les apports qu'il peut faire à la compréhension du monde et plus particulièrement de certaines puissances émergentes en mettant leur diversité et leurs points communs en perspective de façon à dégager une grille de compréhension, parcellaire certes, mais utile au futur diplômé.

Courses	Level of studies	SEMESTER	Number of hours taught	Number of ECTS delivered	Synopsis
<u>UE Research & TIC (2 EC)</u> EC1 : Research project, level 1	Master academic studies	1 - Fall semester	{ 20 }	{ 3 }	The purpose of this course is to help you get started on your research project by presenting issues and providing practice in scientific writing. At the end of this year (M1), you will submit an individual research paper on a topic in your study area. The research paper will use your documentary research, and will present a literature review of the essential points of your topic. This semester we will be working on : Choosing your research topic ; Formatting the references section (APA style) ; Citing sources without plagiarizing ; Integrating sources using generalizations and paraphrases.
<u>UE Research & TIC (2 EC)</u> EC2 : ICT tools for research production	Master academic studies	1 - Fall semester			This aim of this course is an introduction to the reference and citation management software Zotero in order to better equip you for conducting your personal research projects throughout your Master's course. Zotero is open-source software and runs on both PC and Mac.
<u>UE Technical writing and info design (3 EC)</u> EC1 : Introduction to technical communication	Master academic studies	1 - Fall semester	{ 40 }	{ 3 }	This course is an introduction to documentation project management. The purpose of the course is to introduce you to the types of writing tasks and design principles that are at the heart of technical writing and information design. We will be working on creating user-centered texts: technical descriptions, operating procedures and instructions, safety standards and warnings, visuals, user manuals, press releases, etc.
<u>UE Technical writing and info design (3 EC)</u> EC 2 : Technical and scientific writing	Master academic studies	1 - Fall semester			The purpose of this course is to give you concrete experience, practice, and support in designing and writing technical information. In particular, the course will focus on the genres of technical memos and technical reports. In relation to these two text types, different language principles applied to technical communication will be examined, as well as common errors in technical writing.
<u>UE Technical writing and info design (3 EC)</u> EC 3 : Theories of technical communication	Master academic studies	1 - Fall semester			The purpose of this course is to expand your knowledge about theories that are used as a basis for research and knowledge building in the field of Technical Communication. It is designed to give you a broad, theoretical background for your own research projects. Theories covered in the course: Minimalism, Rhetorical theory, Genre theory, Activity theory, Sociocultural cognitive theory, Community of practice.
<u>UE Outils du développement international (niv. 1) (3 EC)</u> EC1 :Tools and techniques for international trade	Master academic studies	1 - Fall semester	20	1,5	To enable students to be aware of and to use the fundamental tools and techniques in international business.To understand the fundamental tools and techniques in international business and to be able to appreciate their pertinence to specific situations within the international business environment.To critically select, apply and evaluate the different tools and techniques.1. Incoterms in theory and in practice 2. International logistics and export pricing 3. Means and techniques of international payments
<u>UE Langues et cultures (3 EC)</u> EC 3 : Societal and cultural concepts in the English-speaking world 2	Master academic studies	1 - Fall semester	10	2	L'Anglosphère, notion intimement liée à l'expérience coloniale, ne peut se réduire à une description ou une analyse du monde de l'anglophonie. Laissant de côté les pays issus essentiellement d'un peuplement européen (États-Unis, Canada, Australie), cet enseignement se concentrera sur les pays de rencontre entre les cultures colonisatrices et les cultures des peuples colonisés et fait suite au cours du semestre 1. Cette seconde partie portera sur un nombre de pays et/ou régions à statut spécial choisis en fonction de leur importance démographique, politique ou économique.

Courses	Level of studies	SEMESTER	Number of hours taught	Number of ECTS delivered	Synopsis
<u>UE Recherche & TIC (1 EC)</u> EC 1 : Research project, level 2	Master academic studies	1 - Fall semester	10	3	The purpose of this course is to continue providing support for your research project by providing practice in scientific writing.. At the end of this year (M1), you will submit an individual research paper on a topic in your study area. The research paper will use your documentary research, and will present a literature review of the essential points of your topic. This semester we will be working on : Writing the synthesis, by incorporating outside sources; Writing the literature review ; Writing the introduction to a research paper .
<u>UE User-centered approach and ergonomics (2 EC)</u> EC 1 : Information design	Master academic studies	1 - Fall semester	24	3	The purpose of this course is to give you theoretical background, concrete experience, practice and support in designing and writing different types of information. We will be working toward: Identifying and applying basic design principles, such as those derived from Gestalt psychology, in order to meet aesthetic and rhetorical considerations; Recognizing the role of information design in workplace and public contexts; Demonstrating an awareness of information design as a problem-solving process, and an understanding of that process; Evaluating the effectiveness of a document's design in terms of both its originality and its ability to meet the needs of a particular audience; Designing and producing a variety of documents for a range of audiences, purposes, and contexts.
<u>UE User-centered approach and ergonomics (2 EC)</u> EC 2 : User studies	Master academic studies	1 - Fall semester			This course covers the fundamentals of user study methods that can be employed by a company in order to gain information about who is using a specific product (documents/materials), how they are using the product, and whether the product fits their needs. The course will provide you with a toolbox of research techniques that can be applied to information design to study user behaviour. We will examine different ways to interpret results and how to take action on these.
<u>UE Outils du Commerce International (2 EC)</u> EC 1 : Global supply chain management	Master academic studies	1 - Fall semester	30	4	This course covers the fundamentals of the SCM which is the management of material and information flow in a supply chain to provide the highest degree of customer satisfaction at the lowest possible cost. SCM requires the commitment of supply chain partners to work closely to coordinate order generation, order taking, and order fulfillment. SCM is the oversight of materials, information, and finances as they move in a process from supplier to manufacturer to wholesaler to retailer to consumer.
<u>UE Outils du Commerce International (2 EC)</u> EC 2 : Principles of international marketing & solidarity marketing	Master academic studies	1 - Fall semester			The purpose of this course is to explain how International Marketing is the application of marketing principles to satisfy the varied needs and wants of different people residing across the national borders. The International Marketing is to undertake the marketing activities in more than one nation. It is often called as Global Marketing, i.e. designing the marketing Mix (Product, price, place, promotion) worldwide and customizing it according to the preferences of different nation people.
<u>UE Langues et Cultures (3 EC)</u> EC 3 : Societal and cultural concepts in the English-speaking world 3	Master academic studies	1 - Fall semester	10	2	Mobilities, communities and solidarity : Traditionnellement associé à des disciplines comme la géographie ou la sociologie, le terme de mobilité, et sa version plurielle, mobilités, sont devenus des concepts incontournables pour une meilleure compréhension de la mondialisation. Cet enseignement se propose ainsi d'explorer les interactions économiques, sociales et culturelles en portant un regard particulier sur certaines communautés, anciennes ou plus récentes, installées dans le monde anglo-saxon ou au-delà de ses frontières via le phénomène de diaspora, ainsi que les réseaux et formes de solidarité qui en découlent.

Courses	Level of studies	SEMESTER	Number of hours taught	Number of ECTS delivered	Synopsis
UE Recherche et TIC (1 EC) EC 1 : Research project, level 3	Master academic studies	1 - Fall semester	10	3	The purpose of this course is to continue providing support for your research project by providing practice in scientific writing. At the end of this year (M2), you will submit an individual research paper or Masters thesis on a topic in your study area. The research paper/thesis will describe your research question and use your documentary research in a literature review to present the essential theoretical and background issues of your topic. It will also present the results of your study based on a clear methodology. This semester we will be working on : Clarifying the research question; Constructing scientific hypotheses; Writing a synthesis.
UE Technical writing & Information design (4 EC) EC 1 : Intercultural communication	Master academic studies	1 - Fall semester	28	3	In an increasingly globalized work environment, knowing how to communicate with audiences from different cultures and design effective materials is absolutely essential for good business practices. The strategic importance of having employees well-trained in intercultural communication is increasingly recognized by both multinationals and small and medium-sized enterprises (SMEs) throughout France and the E.U. A survey of SMEs across Europe (ELAN, 2006), commissioned by the Directorate General for Education and Culture of the European Commission, found that from 1996-2006, European SMEs had undergone a significant loss in business as a result of workers' poor intercultural communication skills. The study estimated that at least 945,000 European SMEs had been losing trade for this reason. Strong intercultural and language training was viewed by the study authors as crucial for stimulating the European economy. This class is designed to help you gain an understanding of how culture affects expectations and presentation styles in communication. Its approach to understanding intercultural communication is based both on anthropology and linguistics (i.e., interactional socio-linguistics and discourse analysis) : To understand 'culture' and its context, we need the tools and approaches devised in anthropology and its sister-discipline, ethnography ; To understand why cultural misunderstandings occur, we need to see how they are actually linguistic misunderstandings.
UE Technical writing & Information design (4 EC) EC 2 : Technical writing	Master academic studies	1 - Fall semester			The purpose of this course is to give you concrete experience, practice, and support in designing and writing technical information. In particular, the course will focus on the elements, language, and skills needed to design and write a short user's manual that is both clear and coherent.
International business skills	Master academic studies	1 - Fall semester	20	1,5	To thrive in the world of international business today demands an entirely different set of skills than was expected even a decade ago. Now more than ever, global professionals face a business environment which is volatile, uncertain, complex, and ambiguous. The skills needed to navigate this new, globalized business landscape aren't the "hard skills" of, say, analysis or accounting. While strong technical know-how is still essential, it is the "soft skills" that can mean the difference between survival and true success in international business. Students will improve personal qualities and develop the capability of adjusting to local culture, as well as develop knowledge and skills in the fields of International Branding, Human Resource Management, Social Business Skills and International Marketing Communication whilst doing business in an international context, with a particular emphasis on negotiation. <ul style="list-style-type: none"> • Negotiation skills in a Cross-cultural context • Networking abilities • Developing collaborative relationships • Developing interpersonal influence • Using adaptive thinking Building emotional intelligence and resilience
